**Needs and Uses:** On December 17, 2015, the Commission released a Second Report and Order, FCC 15-167, titled, “In the Comprehensive Review of Licensing and Operating Rules for Satellite Services.” In this Report and Order, the Commission adopted comprehensive changes to 47 CFR Part 25, which governs licensing and operation of space stations and earth stations for the provision of satellite communication services. Many of the amendments are substantive changes intended to give licensees greater operational flexibility.

The information collection requirements in this collection are needed to determine the technical, legal, and other qualifications of applicants and licensees to operate a radio station and to determine whether grant of an authorization serves the public interest, convenience and necessity. Without such information, the Commission could not determine whether to permit respondents to provide communications services in the United States. Therefore, the Commission would not be able to fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended, and the obligations imposed on parties to the World Trade Organization Basic Telecom Agreement.
